THERE'S HARDFACING, THEN THERE'S

BLUESTEEL™
HF-9000

sales@stabildrill.com | stabildrill.com

GET TRUE STEEL WITH BLUESTEEL

- CNC application for exceptional accuracy
- Low-temperature application for a more durable weld layer
- Ensures superior wear resistance
- Allows for easier tool repair

BOOST YOUR TOOLS WITH BLUESTEEL

Maximize wear resistance on most tool specifications with steel PTA treatments.

65% TUNGSTEN CARBIDE

Our proprietary hardfacing technique uses a greater concentration of tungsten, delivering stronger protection with the same amount of material.

BETTER STEEL WITH **BLUESTEEL™**

BlueSteel HF-9000 goes beyond standard hardfacing applications to bring an ultra-tough tungsten carbide matrix that gives tools unparalleled protection. Our proprietary hardfacing technique gives you greater tool longevity, less downtime, and an overall lower cost. When cutting costs means stronger tools, it must be BlueSteel.
